### EXAMINER'S AMENDMENT

1. This Office Action is responsive to the amendment filed August 10, 2005. The Examiner acknowledges the amendments to the specification; the amendments to the drawings; the amendments to claims 1, 3, 5, 10, 12 and 13; and the addition of new claims 21-25. Claims 1-25 are pending.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Cofield on September 22, 2004.

3. The application has been amended as follows:

a. Claim 1 has been amended as follows:

1. (currently amended) A urine collection device, comprising:  
a support apparatus for supporting the urine collection device on a toilet;  
an attachment section for detachably coupling to a sample holder; and  
a collection section including an elongated channel integrally formed with the support apparatus ~~and including an elongated channel~~ for receiving and directing urine into the sample holder;

wherein the support apparatus includes oppositely opposed arms extending in opposite directions from the attachment section.

b. Claim 9 has been canceled.

c. Claim 10 has been amended as follows:

10. (currently amended) A urine collector, comprising:  
a support apparatus for supporting the urine collector on a toilet;  
a collection section for receiving the urine; and  
a cap section for detachably coupling to and substantially covering a removable sample cup and directing the urine from the collection section into the sample cup;

wherein the cap section includes a first opening for receiving the urine from the collection section and a second overflow opening that allows urine to overflow from the sample cup into the toilet.

d. Claim 17 has been amended as follows:

17. (currently amended) A urine sample collection device, comprising:  
an apparatus configured to sit on a toilet bowl and receive urine, the apparatus including an elongated channel funneling the received urine into a detachable sample cup and a dam that prevents an initial portion of the urine from entering the sample cup.

e. Claims 24 and 25 have been canceled.

4. The following is an examiner's statement of reasons for allowance:

Regarding claims 1, 2, 21, 22 and 5-8, no prior art of record teach or fairly suggest a urine collection device, as claimed by Applicant, where a collection section including an elongated channel integrally formed with a support apparatus having oppositely opposed arms extending in opposite directions from the attachment section receives and directs urine into the sample holder.

Regarding claims 3 and 4, no prior art of record teach or fairly suggest a urine collection device, as claimed by Applicant, where the flow divider includes a cavity in the collection section that collects the first portion of the urine and a hole at a bottom end of the cavity directs the first portion of the urine into the toilet.

Regarding claims 10, 11, 23, 15 and 16, no prior art of record teach or fairly suggest a urine collection device, as claimed by Applicant, where a cap section, including a first opening for receiving the urine from the collection section and a second overflow opening that allows urine to overflow from the sample cup into the toilet, detachably couples to and substantially covers a removable sample cup and directs the urine from the collection section into the sample cup.

Regarding claim 12, no prior art of record teach or fairly suggest a urine collection device, as claimed by Applicant, where the preflow divider includes a chamber in the collection section that collects the first portion of the urine and a hole at a bottom end of the chamber directs the first portion of the urine into the toilet.

Regarding claims 13 and 14, no prior art of record teach or fairly suggest a urine collection device, as claimed by Applicant, where a preflow divider for directing a first portion of the received urine away from the sample cup and into the toilet and where the cap section

includes a first opening for receiving the urine from the collection section and a second overflow opening that allows urine to overflow from the sample cup into the toilet.

Regarding claims 17-20, no prior art of record teach or fairly suggest a urine collection device, as claimed by Applicant, that is configured to sit on a toilet bowl to receive urine and that includes an elongated channel to funnel the received urine into a detachable sample cup and a dam for preventing an initial portion of the urine from entering the sample cup.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
